(1) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of our estimate of the burden for this collection of information, including the validity of the methodology and assumptions used;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) How the agency might minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of response.

Comments that you submit in response to this notice are a matter of public record.

Abstract: The BLM is required by the Materials Act of 1947 (30 U.S.C. 601 and 602) and section 302 of the Federal Land Policy and Management Act (43 U.S.C. 1732) to manage the sale and free use of mineral materials that are not subject to mineral leasing or location under the mining laws (e.g., common varieties of sand, stone, gravel, pumice, pumicite, clay, and rock). The Materials Act authorizes the BLM to sell these mineral materials at fair market value and to grant free-use permits to government agencies and nonprofit organizations. To obtain a sales contract or free-use permit, an applicant must submit information to identify themselves, the location of the site, and the proposed method to remove the mineral materials. The BLM uses the information to process each request for disposal, determine whether the request to dispose of mineral materials meets statutory requirements, and whether to approve the request. This OMB Control Number is currently scheduled to expire on February 29, 2024. The BLM plans to request that OMB renew this OMB Control Number for an additional three years.
